#### **Background to the Company**

JK Funds Plc (the "Company") was incorporated under registration number 532101 on 30 August 2013 and operates as an investment company with variable capital structured as an umbrella fund with segregated liability between sub-funds, (each a "Fund") pursuant to the Companies Act 2014 (as amended) and has limited liability in Ireland.

The Company is authorised by the Central Bank of Ireland (the "Central Bank") under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, (as amended), (the "UCITS Regulations") and under the Central Bank (Supervision And Enforcement) Act 2013 (Section 48(1) (Undertakings for Collective Investment In Transferable Securities) Regulations 2019), (the "Central Bank UCITS Regulations").

The Company is an "umbrella fund" enabling investors to choose between one or more investment objectives by investing in one or more separate Funds offered by the Company, with each Fund comprising a separate and distinct schedule of investments.

With the prior approval of the Central Bank, the Company may, from time to time, establish Funds, the investment policies and objectives for which will be outlined in a Supplement, together with details of the Initial Offer Period, the Initial Offer Price for each Share and such other relevant information in relation to the Fund as the Directors may deem appropriate, or the Central Bank requires, to be included.

The investment objective of the JK Global Opportunities Fund (the "Fund") is to achieve above average long term capital appreciation. The Fund will seek to achieve its investment objective through investment in three principal asset classes being equities, bonds, and currencies through a global macro trading strategy which involves taking strategic short term positions and tactical long term positions across global markets (including emerging markets). The Fund may also invest in exchange traded notes. The Fund is actively managed and is not managed by reference to a benchmark. The Fund may invest up to 100 per cent of the entire portfolio in emerging markets. There can be no assurance that the Fund will achieve its investment objective and losses may be incurred.

The investment objective of the JK Japan Fund (the "Fund") is to achieve long term capital appreciation. The Fund will seek to achieve its investment objective by investing primarily in Japanese equities, which are listed or traded on a Recognised Exchange including, but without limitation, common and preferred stock. The Fund may also hold cash and deposits within the Depositary's sub-custodian network pending investment. The Fund may at any particular time be invested up to 100 per cent of the entire portfolio in Japanese equities. It is expected that the Fund will typically be invested in under 50 Japanese equities.

The Company may create separate Classes within each Fund to accommodate, inter alia, different currencies, charges, fees, distribution arrangements and/or Class Level Transactions, provided that the Central Bank is notified in advance, and gives prior clearance, of the creation of each such Class.

At 30 June 2020 the Company had two sub-funds (31 December 2019: one sub-fund), namely JK Global Opportunities Fund (the "Fund") and JK Japan Fund (the "Fund") (collectively the "Funds"). The base currency of the JK Global Opportunities Fund is US dollar and. JK Japan Fund is Japanese Yen. The Funds offered accumulation Shares. The Share Classes and type of Shares are:

#### **Investment Manager's Report**

for the financial period ended 30 June 2020

#### JK Global Opportunities Fund

The JK Global Opportunities Fund performance for the financial period 31 December 2019 to 30 June 2020 was as follows (Net of fees): USD class +5.24%, GBP class +5.44, YEN class +5.71%, and EUR class +5.64.

The Fund rose +5.24% over the period, which was one of the most extreme market environments we have ever witnessed, as investors grappled with a unique set of health, economic, social, and political factors brought about by the COVID-19 pandemic.

The Fund navigated this volatile period relatively successfully, as we were quick to reduce risk exposures aggressively once it became clear that the virus was spreading globally, limiting downside in the February/March crash. Our portfolio hedges provided further downside protection during this period, including our long YEN position. We also took advantage of the significant uptick in market volatility to engage in various option strategies which added further value – mainly writing put options on equity market indices.

Having avoided the brunt of the collapse and built up large cash reserves in doing so, we began to put this to work again in April, as policymakers unleashed extraordinary stimulus measures to prop up economies and markets. The FED, in particular, reacted quickly to backstop the dollarized global financial system by redeploying GFC-era swap lines and a new treasury repo facility with foreign central banks, which helped stabilise funding markets and avoid significant credit events. At the same time, central banks everywhere aggressively slashed interest rates and opened the liquidity taps, whilst governments provided fiscal support to replace the lost income of businesses and consumers.

Markets staged a strong rally off the lows in response, although there have been significant divergences in relative sector returns. The Fund capitalised on this by investing in businesses with strong balance sheets and earnings resilience, namely US and Chinese tech, which we identified as being key beneficiaries of the stay-at home economy. Our long exposure to Japan through high-quality growth companies and a Nikkei dividend future also added to gains in this period.

#### Outlook

Despite the strong run in markets recently, we still feel it is right to maintain a pro-risk stance. Investor surveys continue to show a degree of bearishness and valuations still look sensible on our preferred models of liquidity and long-run real returns. We are also optimistic on the prospects for at least one vaccine approval this year because of the large pipeline, mostly strong preliminary results, and developer plans to seek approval starting in Q4. All of this against a backdrop of unprecedented monetary and fiscal support.

The main risk to this outlook would be a significant back-up in yields, potentially due to a pick-up in inflation. Whilst we have to be open-minded to a range of possibilities, we think equities should perform well if higher yields are a reflection of stronger growth, although we would need to consider a more cyclical/value-oriented exposure.

Political risks will also remain elevated as we approach the US election. In terms of who wins the White House, we think Trump's re-election will be a more favourable outcome for markets given his pro-business agenda and plans to cut capital gains taxes. In contrast, Biden plans to raise the corporate tax rate and increase scrutiny of big tech and pharmaceutical companies. Having said that, the impact of either result on markets will depend on the perceived likelihood of delivering both platforms, which will ultimately come down to the final make-up of Congress. If Democrats fail to win the Senate for example, tax hikes would be a political non-starter.

#### **Investment Manager's Report (continued)**

for the financial period ended 30 June 2020

#### JK Japan Fund

The JK Japan Fund performance for the financial period 4<sup>th</sup> March to 30<sup>th</sup> June 2020 was as follows (Net of fees): YEN class +15.63%, USD class +15.75%, and GBP class +15.36%

The JK Japan Fund was launched on 4<sup>th</sup> March 2020 and returned +15.75% (USD class) from this date to 30<sup>th</sup> June. This was in comparison to the Topix which returned +3.56% over the same period. This outperformance can be attributed to the Fund's concentration in high-quality growth companies, which were able to weather the Coronavirus pandemic well as a result of their healthy balance sheets and flexible business models.

#### **Outlook**

We remain optimistic on the medium-term outlook for the JK Japan Fund's holdings, most of which have reported better than expected earnings during this most challenging period (examples would include Sony, Daikin, Unicharm, Nidec, and Itochu Techno), with dividends maintained – a testament to their balance sheet strength.

Turnover remains fairly low, with the portfolio focussed on robust businesses, whose managements' have a laser focus on profitability, and a proven ability to allocate the firms' capital effectively.

We continue to feel that in this Alice in Wonderland World of low/negative interest rates, quality long duration assets with predictable cash flows remain extremely attractive, and as such remain the Fund's primary focus. The interesting point about Japan is that many businesses with these sorts of characteristics can be found in the manufacturing sector.

#### **Notes to the Condensed Financial Statements**

for the financial period ended 30 June 2020

#### 1. Summary of significant accounting policies

The principle accounting policies applied in the preparation of these financial statements are set out below.

#### **Basis of presentation**

These interim report and condensed financial statements have been prepared in accordance with IAS 34, "Interim Financial Reporting" and should be read in conjunction with the audited financial statements for the financial year ended 31 December 2019, which have been prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by the EU, Irish Statute comprising the Companies Act 2014 (as amended), the UCITS Regulations and the Central Bank UCITS Regulations.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires the Board of Directors to exercise its judgement in the process of applying the Company's accounting policies.

The comparative figures presented in the Condensed Statement of Financial Position relate to the previous year ended 31 December 2019. The comparative figures included in the Condensed Statement of Comprehensive Income, Condensed Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares and Condensed Statement of Cashflows relate to the six-month period ended 30 June 2019.

#### **Accounting policies**

The same accounting policies, presentation and methods of computation have been followed in these financial statements as were applied in the preparation of the Company's audited financial statements for the financial year ended 31 December 2019, as described in those financial statements.

#### 2. Financial Derivative Instruments and Efficient Portfolio Management

The Company may utilise Financial Derivative Instruments ("FDIs") for investment purposes and may employ techniques and instruments relating to transferable securities, including investments in FDIs, for efficient portfolio management purposes. New techniques and instruments may also be developed which may be suitable for use by the Company and the Investment Manager may employ such techniques and instruments in the future for the purpose of efficient portfolio management with a view to achieving a reduction in risk, a reduction in costs or an increase in capital or income returns to the Company and may not be speculative in nature.

Techniques and instruments which relate to transferable securities and which are used for the purpose of efficient portfolio management, including FDIs which are not used for direct investment purposes, shall be understood as a reference to techniques and instruments which fulfil the following criteria:

- (a) they are economically appropriate in that they are realised in a cost-effective way;
- (b) they are entered into for one or more of the following specific aims:
  - (i) reduction of risk:
  - (ii) reduction of cost;
  - (iii) generation of additional capital or income for the Company with a level of risk which is consistent with the risk profile of the Company and the risk diversification rules set out in the UCITS Regulations;
- (c) their risks are adequately captured by the risk management process of the Company; and
- (d) they cannot result in a change to the Company's declared investment objectives or add supplementary risks in comparison to the general risk policy as described in the sales documents.

During the period ended 30 June 2020 and 31 December 2019, the Company entered into contracts for difference, total return swap and futures contracts for investment purposes. Investments in FDIs are subject to the conditions and limits laid down by the Central Bank.

Forward and spot foreign currency contracts were utilised by the Company for efficient portfolio management purposes during the period, in particular hedging of non-base currency share classes. The exposure of the JK Global Opportunities Fund and JK Japan Fund on these at 30 June 2020 were USD 54,924,332 (31 December 2019: USD 49,314,889) and JPY 2,330,090,283 (31 December 2019: JPY Nil) respectively. The realised and unrealised gains and changes in unrealised gains and losses arising from these contracts in the six months to 30 June 2020 was USD (3,496,039) (30 June 2019: USD (878,052)) and JPY (469,976) (30 June 2019: JPY Nil) exposure of the JK Global Opportunities Fund and JK Japan Fund respectively. Transaction costs on forwards are embedded in their contract price and are therefore not separately identifiable for disclosure within the financial statements. The counterparties to the forward foreign currency contracts are disclosed at the end of the Schedule of Investments.

#### **Notes to the Condensed Financial Statements (continued)**

for the financial period ended 30 June 2020

#### 3. Accounting classifications and fair values

The Company is required to classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements.

The fair value hierarchy has the following levels as defined under IFRS 13.

Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3 - Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety.

If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' requires significant judgement by the Company. The Company considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

## **Notes to the Condensed Financial Statements (continued)**

for the financial period ended 30 June 2020

#### 3. Accounting classifications and fair values (continued)

The following table shows the carrying amounts and fair values of financial assets and financial liabilities, including their levels in the fair value hierarchy. It does not include fair value information for financial assets and financial liabilities not measured at fair value if the carrying amount is a reasonable approximation of fair value.

#### **JK Global Opportunities Fund**

#### **Notes to the Condensed Financial Statements (continued)**

for the financial period ended 30 June 2020

#### 3. Accounting classifications and fair values (continued)

Investments, whose values are based on quoted market prices in active markets, and are classified within level 1. The Company does not adjust the quoted price for these instruments.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2. As level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

Investments classified within level 3 have significant unobservable inputs, as they trade infrequently. The Fund held no level 3 investments during the financial period ended 30 June 2020 or during the year ended 31 December 2019.

There were no prices required to be provided during the period by the Directors in consultation with the Investment Manager or other person or equivalent in respect of stale prices, hard to value assets, or derivative instruments.

Transfers between levels are deemed to have occurred when the pricing source for a particular security has changed which triggers a change in level. There were no significant transfers between level 1 and level 2 financial assets or financial liabilities at fair value through profit or loss during the financial period ended 30 June 2020 or during the year ended 31 December 2019.

#### 4. Amounts due from/to brokers

As at 30 June 2020 and 31 December 2019, restrictions on the use of balances due from brokers exist due to open derivative positions. As at 30 June 2019, an amount of USD 8,202,743 was restricted (31 December 2019: USD 8,507,932) for the JK Global Opportunity Fund and JPY 56,547,573 for the JK Japan fund.

Amounts due to brokers represent payables for securities purchased that have been contracted for but not yet settled or delivered on the Statement of Financial Position date respectively. As at 30 June 2020, total unsettled transactions were JPY 57,664,057 for the JK Japan fund.

#### 5. Share capital

On establishment and registration of JK Funds Plc in Ireland on 30 August 2013, the authorised share capital of the Company became 2 Subscriber Shares of €1 par value per Share and 1,000,000,000,000 Shares of no par value initially designated as unclassified shares. The Subscriber Shares do not form part of the net assets of the Fund or the Company and are disclosed by way of this note only. The unclassified shares are available for issue as Shares. The issue price is payable in full on acceptance. There are no rights of pre-emption attaching to the Shares in the Company.

The unclassified Shares issued are Redeemable Participating Share capital of the Company and at all times equal the NAV of that Company. Redeemable Participating Shares are redeemable at the Shareholders option and are classified as financial liabilities. Share capital transactions, excluding the in-specie transfer of shareholdings arising from the re-organisation and redomiciliation of the Company, for the financial period ended 30 June 2020 are shown in the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares.

The JK Global Opportunities Fund has the following Redeemable Participating Shares in issue at 30 June 2020:

	Number of shares outstanding 31 December 2019	Shares subscribed	Shares redeemed	Number of shares outstanding 30 June 2020	Net asset value per share 30 June 2020*

#### 7. Related party disclosures

In the opinion of the Directors, the Investment Manager, Promoter, Distributor and the Directors are related parties under IAS 24 "Related Party Disclosures".

The Directors, or where applicable the service provider of the Director, are entitled to an annual fee for their services in the instance of Simon Ogus, Fiona Ross and Gerry Brady for the Company and its Funds – JK Global Opportunities Fund and JK Japan Fund. Francis Kirkpatrick and Simon Jones do not receive an annual fee for their service as Directors. There were no Directors' fees waived during the period ended 30 June 2020.

Directors' fees for the period ended 30 June 2020 amounted to USD 27,392 (30 June 2019: USD 28,010). The fee outstanding at the financial period end was USD 27,932 (31 December 2019: USD Nil).

As at 30 June 2020, the following related parties had an interest in JK Global Opportunities Fund, Mr Simon Jones and family held 52,785.42 Yen Management Shares, (31 December 2019: 52,797.42). Mr Francis Kirkpatrick and family held 32,377.08 Yen Management Shares, (31 December 2019: 32,377.08). None of the other Directors or their family members held shares in the Company at any time during the reporting period.

Cross-investments are considered transactions within the Company's Funds. As at 30 June 2020, JK Global Opportunities Fund hold 156,526.48 (31 December 2019: Nil) shares in JK Japan Fund carrying amount of which is USD 18,117,941 (31 December 2019: Nil).

Fees paid and payable to the Investment Manager, the Administrator and the Depositary are shown on the Statement of Financial Position and the Statement of Comprehensive Income respectively.

#### **Notes to the Condensed Financial Statements (continued)**

for the financial period ended 30 June 2020

#### 8. Directed Brokerage / Soft Commissions and Research Costs

As described in the prospectus, the Investment Manager may effect transactions or arrange for the effecting of transactions through brokers with whom it has arrangements whereby the broker agrees to use a proportion of the commission earned on such transactions to discharge the broker's own costs or the costs of third parties in providing certain services to the Investment Manager. The services which can be paid for under such arrangements are those permitted under the rules of the Financial Conduct Authority, namely those that relate to the execution of transactions on behalf of customers or the provision of investment research to the Investment Manager. The benefits provided under such arrangements will assist the Investment Manager in the provision of investment management services to the Company. The Investment Manager opened a Research Payment Account in line with MIFID II regulations.

Specifically, the Investment Manager may agree that a broker shall be paid a commission in excess of the amount another broker would have charged for effecting such transaction so long as, in the good faith judgement of the Investment Manager, the amount of the commission is reasonable in relation to the value of the brokerage and other services provided or paid for by such broker and the broker agrees to provide best execution on with respect to such transaction.

Subject to applicable laws and regulations, authorised delegates of the Investment Manager may enter into similar arrangements with brokers. Where the Investment Manager, or any of its delegates, successfully negotiates the recapture of a portion of the commissions charged by brokers or dealers in connection with the purchase and/or sale of securities or FDI for a Fund, the rebated commission shall be paid to the relevant Fund. The Investment Manager or its delegates may be paid/reimbursed out of the assets of the relevant Fund for reasonable properly vouched costs and expenses directly incurred by the Investment Manager or its delegates in this regard.

Effective 3 January 2018, the use of directed brokerage and soft commissions was replaced by new rules under MIFID II.

Under this, the provision of investment research to the Investment Manager is separately invoiced by research providers and brokers, as opposed to being bundled into commission costs or by use of soft commissions. The benefits provided under such arrangements will assist the Investment Manager in the provision of investment management services to the Company, and is funded by a Research Payment Account (RPA) in the name of the Investment Manager in line with MIFID II regulations opened at 3 January 2018. This was funded initially by research charges levied by a broker in addition to execution services, and from 29 October 2018 by a research charge direct to the Company.

In the six months to 30 June 2020, the research charge expensed directly to the Company was USD 179,012. In the six months to 30 June 2019, the research charge expensed directly to the Company was USD 178,521.

#### 9. Exchange rates

The financial statements are prepared in U.S. Dollar (USD). The following exchange rates at 30 June 2020 and 31 December 2019 have been used to translate assets and liabilities into the reporting currency:

	Exchange Rates to USD	Exchange Rates to USD	Exchange Rates to JPY
	30 June 2020	31 December 2019	30 June 2020

#### **Notes to the Condensed Financial Statements (continued)**

for the financial period ended 30 June 2020

#### 10. Commitments and contingencies

The Company enters into contracts that contain a variety of indemnifications. The Company's maximum exposure under these arrangements is unknown, as this would include future claims that may be made against the Company that have not yet occurred. However, the Company has not had prior claims or losses pursuant to these contracts and expects the risk of loss to be remote. Accordingly, the Company has not accrued any liability in connection with such indemnifications.

#### 11. Connected persons

Regulation 43(1) of the UCITS Regulations "Restrictions of transactions with connected persons" states that "A responsible person shall ensure that any transaction between a UCITS and a connected person is conducted: a) at arm's length; and b) in the best interest of the unit-holders of the UCITS".

As required under UCITS Regulation 81(4), the Directors, as responsible persons are satisfied that there are in place arrangements, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 43(1) are applied to all transactions with a connected person; and all transactions with connected persons that were entered into during the period to which the report relates complied with the obligations that are prescribed by Regulation 43(1).

#### 12. Dividends

The income and capital gains of the Fund will normally be reinvested and the Company will not ordinarily make distributions in respect of any Class. However, this is at the Directors' discretion.

There were no dividends declared during the financial period ended 30 June 2020 or the financial year ended 31 December 2019.

#### 13. Significant events during the period

The new sub-fund "JK Japan Fund" was launched on 4 March 2020. The base currency of the Fund will be Japanese Yen "JPY" and it will have 8 shares classes split between institutional and ordinary share investors. The Fund will seek to achieve its investment objective by investing in a portfolio of Japanese equities that the Investment Manager believes to be undervalued given their long term growth and business prospects. The new sub-fund has been approved by the Central Bank as at 30 December 2019.

In December 2019, an outbreak of a contagious respiratory virus now known as the COVID - 19 (Coronavirus) occurred and it has since spread globally. The virus has resulted in government authorities in many countries (including the People's Republic of China and Hong Kong, the United States and Europe) taking extreme measures to arrest or delay the spread of the virus including the declaration of states of emergency, restrictions on movement, border controls, travel bans and the closure of offices, schools and other public amenities such as bars, restaurants and sports facilities. This has resulted in a major disruption to businesses both regionally and globally. It is anticipated that these events will have a material effect on general economic conditions and market liquidity, which may in turn adversely affect the financial performance of the Company and its net asset value. The full impact of this COVID-19 pandemic, or other future epidemics/pandemics, is currently unknown.

Conell Cashell of KB Associates was appointed as designated person on 17 February 2020.

There were no other material significant events occurring during the reporting period ended 30 June 2020.

#### 14. Significant events after the period end

Subsequent to the reporting date and up to the date of these financial statements, the JK Global Opportunities Fund received subscription request of 803 shares amounting to USD 240,463 and redemption request of 181 shares amounting to USD 54,198 and the JK Japan Fund received subscription request of 130 shares amounting to JPY 2,007,585.

#### 15. Date of approval of the financial statements

The financial statements were approved by the Directors on 20 August 2020.

### **Schedule of Significant Portfolio Changes**

In accordance with the UCITS Regulations, a statement of largest changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that shareholders can identify changes in the investments held by the fund. These are defined as the aggregate purchases and sales of an investment (including maturities but excluding repurchase agreements, overnight discount notes and time deposits, which are employed chiefly as a means of seeking to ensure efficient portfolio management) exceeding 1.00% of the total value of purchases and sales for the period. At a minimum the largest 20 purchases and sales are listed.
